

Intuitive, actionable insights when you need them most.

Azara’s population health solutions focus on data aggregation, clinical quality, health equity, risk stratification, cost and utilization, care management and coordination.

Azara provides health plans a scalable proven technology with timely, actionable clinical insights to easily partner with provider organizations on clinical quality, risk and performance improvement initiatives.

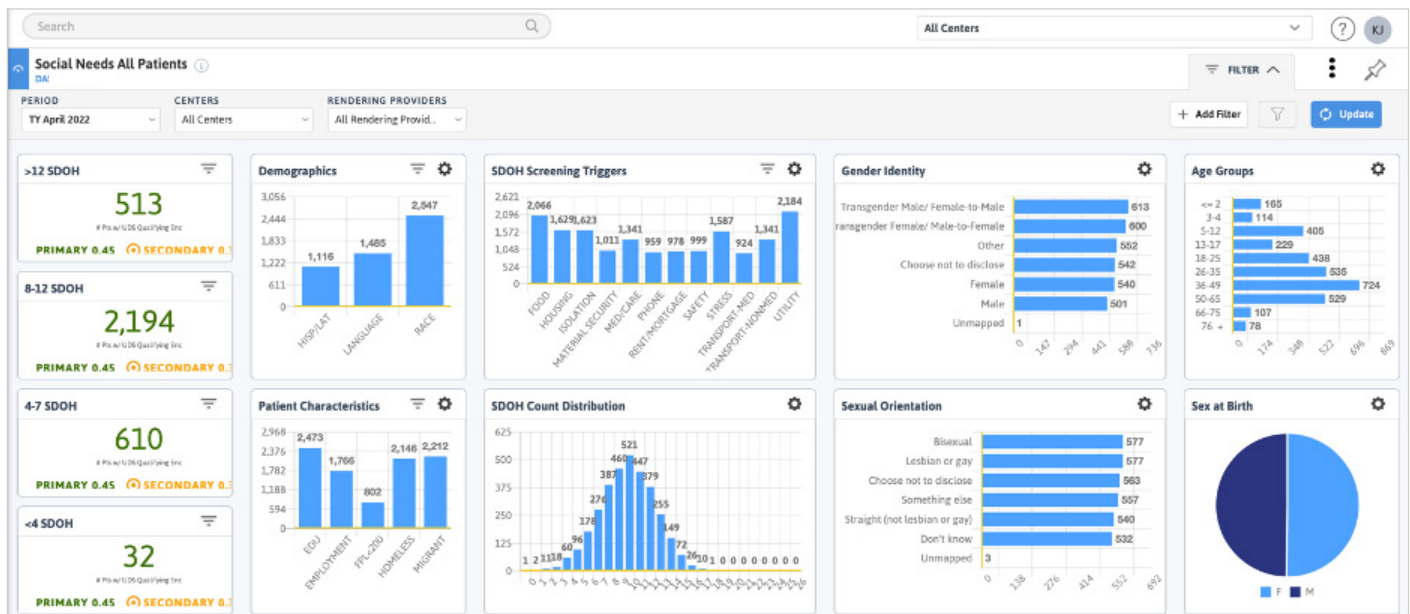

Health Plans use Azara solutions to **engage with providers and members**—improving care by enabling plans to:

- Access and aggregate supplemental data automatically from providers to gain more complete and timely insights to members' conditions and risk
- Deliver comprehensive care gap information at the point of care, at-scale across an entire network
- Support mitigation and prevention efforts by presenting always-on, risk stratification to providers
- Use expanded clinical insights, including SDOH and demographics, to improve HEDIS measures and ensure consideration of the whole patient

Customized for your needs:

- Administrative Dashboard Views
- Care Management Cohort Creation
- Actionable Clinical Insights
- Member/Patient Level Data
- Smart Member/Patient Outreach
- Provider Scorecards
