

DRVS Dental Module

EXPANDED DENTAL REPORTING

The DRVS Dental Module offers an in-depth look at your center’s dental patients. These additional measures, scorecards, alerts, and registry data elements provide the opportunity to maximize your patients’ dental care—fostering dental integration and promoting quality improvement. The DRVS Dental Module deep dives into oral health specific clinical measures, procedures, program management and referrals, combining data from both your Medical and Dental health records.

The Dental Module includes the following components:

Measures

- Annual Prophylaxis Age 0-75
- Caries Risk Assessment Age 0-75
- Elevated Risk for Caries Age 0-75
- Caries at Recall
- New Dental Patients
- Dental Patients with an Oral Evaluation
- Dental Visits: Periodic vs. Comprehensive
- Dental Patients with Periodontal Disease
- Patients with ED Visits for Non-Traumatic Dental Conditions
- Children Receiving Dental Sealant
- Dental Procedures Performed
- Dental Recall Rates
- Dental Treatment Plan Completion
- Oral Health Self-Management Goal Setting Ages 0-75

Alerts

- Caries Risk Assessment (Dental)
- Dental Annual Prophylaxis (Dental)
- Dental Sealant (Dental/Primary Care)
- Dental Visit (Dental)
- Dental Visit Established Patient (Dental)
- Fluoride Varnish (Dental/Primary Care)

Reports

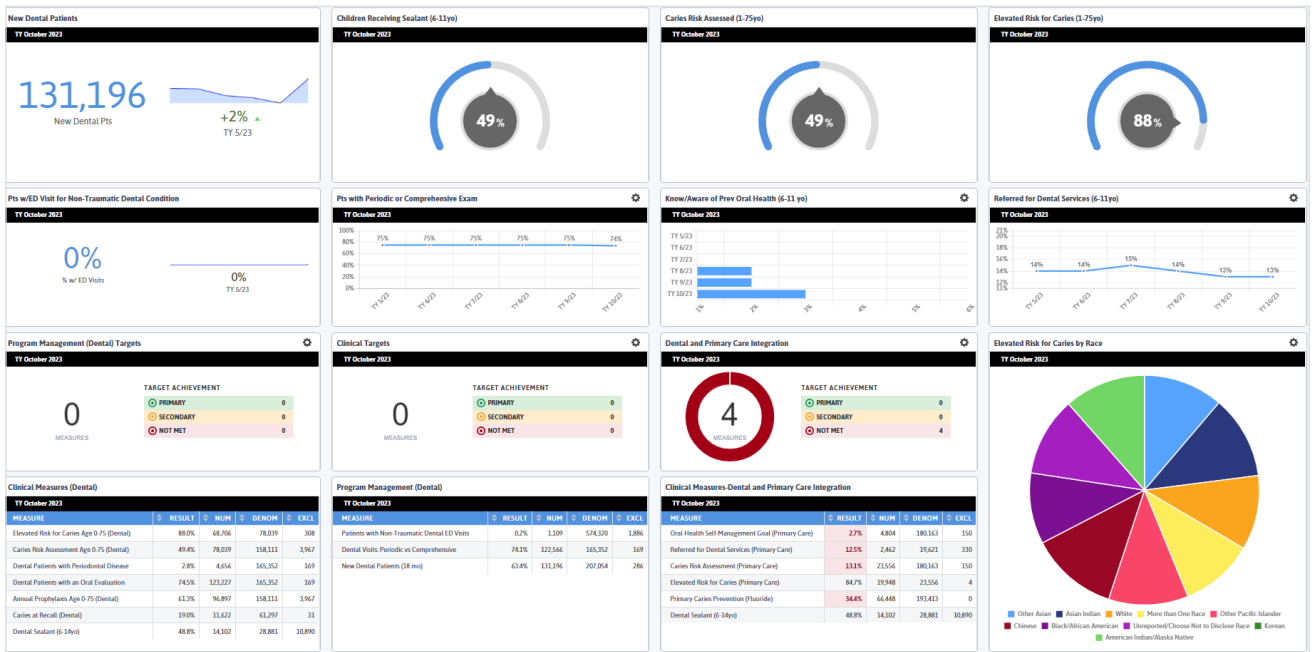

- Dental Clinical Measures
- Dental Interactions and Procedures Measures
- Dental Primary Care Measures
- Dental Program Management Measures

MEASURE	RESULT	TARGET	NUMERATOR	DENOMINATOR
Dental Patients with an Oral Evaluation	88.6%	75.0%	233	263
Annual Prophylaxis Age 0-75 (Dental)	54.2%	67.0%	135	249
Caries Risk Assessment Age 0-75 (Dental)	87.1%	65.0%	217	249
Elevated Risk for Caries Age 0-75 (Dental)	89.9%	Not Set	195	217
Caries Diagnosis at an Oral Recall Exam for Established Dental Patients	3.4%	10.0%	5	148
Dental Patients with Periodontal Disease	27.0%	25.0%	71	263
Children Receiving Sealant (6-14yo)	43.8%	43.0%	7	16
Oral Health Self Management Goal Setting (Dental)	0.0%	30.0%	0	263

FEATURES & BENEFITS

- Access caries risk data to explore trends, identify patients with outstanding dental treatment or active periodontal disease.
- Create custom registries and cohorts using dental registry data elements to learn more about dental populations or for dental provider panel management.
- Build a deeper understanding of your dental populations and the correlation between their oral and systemic health by comparing oral and chronic health condition status, such as those with uncontrolled diabetes and periodontitis.
- Use Patient Visit Planning Report (PVP) or Care Management Passport (CMP) alerts as part of the dental visit to address oral gaps in care.
- With the full suite of pre-built scorecards, measures and registry data elements, users can save time and resources by running reports with one click.

Custom Dashboard*

*Organizations can use the expanded dental reporting measures to create custom dashboards.
